

Thin, circular slice.

$$p = G \frac{\Delta}{r}$$

$$G = \frac{\pi}{\ln 2} \cdot t \cdot C_2 \left(\frac{\Delta}{d}, \frac{d}{s} \right)$$

$$= \frac{\pi}{\ln 2} \cdot t \cdot C_0 \left(\frac{\Delta}{s} \right) \cdot K_2 \left(\frac{\Delta}{d}, \frac{d}{s} \right)$$

$$K_2 \left(\frac{\Delta}{d}, \frac{d}{s} \right)$$

thickness $t < \frac{s}{2}$
